PROFILE

Analytical and results-driven Application Development student with strong foundations in Java and object-oriented programming, experienced in developing GUI-based applications, implementing file handling, applying design patterns, and integrating databases. Demonstrates solid problem-solving ability through academic and group software projects, with a growing focus on backend development and networking concepts. Eager to contribute to a development team, learn industry best practices, and deliver clean, maintainable code in real-world environments.

EXPERIENCE

CAMPUS SMART ATTENDANCE SYSTEM | MARCH 2026-PRESENT

CPUT | THIRD YEAR UNDERGRADUATE GROUP PROJECT

This is an IoT system which assist student along with lectures to track the number of students attended a class, without calculating them manually. So, the system operates by using RFID card for each student. Whenever entering a class, in order to get access, they must tap their RFID card to the attendance system which marks them presents after tapping. The system components configuration was programmed behind the usage of C++, using the Arduino IDE, along with necessary components which included ESP32, RFID card and some Duno jumper wires for connection

MODULE TRACKER AND MARK CALACULATOR • FEB 2025-NOVEMBER 2025

CPUT | Undergraduate Group Project

The mark calculating application was developed in the usage of Java programming language, and a touch of JavaScript, HTML, and CSS for styling.

For the development of the database, we have decided to use Python since it is of less complex syntax, and as for the data manipulation, we used MongoDB

PIZZA MANAGEMENT SYSTEM INTERFACE DESIGN • APRIL 2025-JUNE 2025

CPUT | Undergraduate Group Project

The system user interface design of the system was designed with the usage of an online platform, named Figma, which was facilitated through the involvement of a user story

NON-GOVERNMENTAL ORGANIZATION WEBSITE • FEBRUARY 2024- NOVEMBER 2024

CPUT | Undergraduate Group Project

This was an NGO website which was developed for local-community-organization which specialized in promoting hygiene techniques to members of the community, which allowed community members who wanted to volunteer for community to register on the website for recruitment purposes
